

Gotham City Chronicles

DO NOT FAIL THE CITY!

Master Bruce, I have just gotten a message from Mr. Queen that Black Mask decided to expand his influence and take over a turf in Star City. In order to do that, he is planning on selling personal information of police officers from the SCPD to crime bosses from the Glades and Orchid Bay. Records show he recently acquired quite a bit of money in one of his illegal business, so it comes as no surprise that Deathstroke is cooperating with him. Master Jason also heard about this and decided to head to the place where they expect to make the exchange later today. I know there is a lot of bad blood with Slade Wilson, so I advise you to give some thought when choosing your team. Good luck and be careful,

- 1 Reinforcement : 5 Reinforcement Points
- 2 Retrieving the information : This can only be activated if the hero has hacked the terminal. 7 reinforcement points

Retrieving the information :
A hero in the same area can hack into Black Mask's computer to retrieve the personal information of SCPD officers. To do so, they perform a **complex manipulation of difficulty 5**. The hacking skill is taken into account. If successful, the computer terminal is hacked. To indicate this the terminal is removed from the board and the hero receives a computer token to be placed next to his bat-tablet.

Dropping the intel :
If a hero or a villain character who is in the possession of the information is knocked out, the information is dropped on the board. The computer token is then placed in the same area as the hero, and can be picked up again by either one of the teams by performing an **automatic manipulation**.

END GAME CONDITIONS

- At the end of villain Turn 7, the game ends - the current step is Check-End-game Conditions 2 out of Turn 7
- The information has been retrieved - the heroes or the villain have managed to secure the information at the end of the game

VICTORY CONDITIONS

- HEROES:** The files have been recovered - the computer token is in possession of one of the heroes when the game ends
- VILLAIN:** The files have been uploaded to the buyers - the computer token is in the villain's possession when the game ends
